

## Weekly Learning Reflections

As we wrap up another exciting week of learning in Llewellyn, I'm pleased to share the highlights from our classroom.

In maths, the children successfully completed the 'Big Problem' challenge. They embraced the opportunity to solve number problems and tackle practical issues that required their knowledge of number, place value, rounding and roman numerals. It was great to see the children's enthusiasm, determination and success in cracking the code!

In our English lessons, the children came together in groups to create persuasive speeches, with everyone taking on their own subheading. Their task was to use the persuasive techniques we've been learning throughout the week to convince their classmates to visit a European city of their choice. I am looking forward to Monday when we will discover which group has been the most persuasive.

In PE, we introduced netball positions and continued to develop our attacking and defending tactics. I'm pleased to announce that Mrs. Holmes and I will be leading a netball club after school on Mondays, with trials scheduled for Monday, 16th October. It would be amazing to see as many children as possible join us for this exciting opportunity to represent the school in a competitive league. Please note that it is open to both boys and girls in Year 5 and 6.

This week, our class voted Sophia as the class star of the week for consistently working hard and her willingness to embrace challenges, particularly in maths. My own star this week is Olivia B, who consistently brings a positive attitude into the classroom. Olivia has increased her confidence by actively participating in class discussions and has really challenged herself in her approach to the 'Big Problem'.

Have a great weekend!

Best wishes,  
Miss Whyte
