

Weekly Learning Reflections

Week Beginning:

Happy Friday 😊

We donned our archaeologist hats this week as we whizzed back in time to the Neolithic period of The Stone Age. We specifically focused on Skara Brae as we looked at the ancient sites remains and posed questions to see what it can tell us. A tricky task but some fantastic questions were created. Which led us on to considering if the conclusions we were creating were a certainty or a possibility. We finished the lesson comparing primary and secondary sources of information.

In maths, we have focused on depending our understanding of multiplication and division by using our times tables knowledge to solve our 'big problem' which was to 'escape the classroom'. I was so impressed to see the children actively collecting the resources they needed to help them and also from justifying their explanations with a 'because'. Super independent learners!

The most exciting part of our week had to be the start of rehearsals for our Christmas play 'Christmas Around the World'. Once the children were given their parts, we immediately began to practise the songs and the children's lines in the hall. So far, I have to say that I am very impressed with year 3's determination in learning these songs. They have blown myself and Miss Lamonte away already! Keep it up.

★ ★ ★ STARS OF THE WEEK ★ ★ ★

Pupil Star of the Week - ★ Jemima ★

The children identified Jemima's efforts to be the best she can be by challenging herself, particularly in maths. She was also identified as an excellent co-operator and collaborator.

Teacher Star of the Week - ★ Alex ★

It has been excellent Alex continue to improve his independence across all areas of the curriculum. He is developing the ability to challenge himself more and his cooperation and collaboration skills have shown great improvement too!

Well done to our stars.
