

Weekly Learning Reflections

Week Beginning: 20.11.24

This week has been a fantastic week the class have been really enthusiastic and have worked super hard. They have definitely earned themselves a lot of planets! In maths we have been looking at equivalent fractions and today we began converting from improper fractions to mixed numbers. In English, the children have chosen their mythical creature and have now started to research information and organise their notes into suitable subheadings

Thursday marked an exceptionally exciting day as Mr. Johnson was thoroughly impressed with the children's ukulele playing. Their talent shone through, and they were invited to perform in assembly. Despite the expected nerves, the children delivered a brilliant performance, showcasing their musical skills beautifully.

Today, we put our engineering hats on and tested the strength of our spaghetti truss bridges. It was a hands-on experience as we carefully added weight until the bridges reached their limits. A special congratulations to Table 2, who demonstrated outstanding teamwork skills and now hold the record for the strongest bridge. They managed to withstand an impressive 4.5 kg before the bridge gave way.

Our Star of the Week is Felicity for always being polite, having beautiful manners, and a strong work ethic in all lessons.

Have a fantastic weekend,

Miss Whyte
