

Weekly Learning Reflections

Happy Friday everyone!

Class Astute have been up to lots this week in their learning. From exploring how people lived in the Stone Age at Butser Farm, to rehearsing their line dancing steps in PE to perform in cannon sequence!

Our history topic has also linked to our English writing where we soon will be creating our very own non-chronological report on a stone age creature. So far, we've deconstructed two non-chronological texts for features and powerful language, which we will then use in our writing.

Yesterday we explored forces and friction through practical investigations. In pairs, the children created ramps out of different materials and took turns to roll a ping pong ball down - carefully noting the changes in speed. Eventually, they discovered how different materials cause different levels of friction and therefore impacting the speed of the ball. The children enjoyed learning through these investigations.

In maths we've been practicing our multiplication and division skills from using counters to create arrays. This has helped us to strengthen our multiplication and division facts too and we now feel more confident in understanding commutativity. As you already know, class Astute love a good song and have now perfected the four times table song 'I'm Still Standing'! Super impressed.

Now for stars of the week:

Teacher star of the week goes to Isla for independence. Isla has grown more confident over the last week in applying her knowledge to different tasks. Also, myself and class Astute were very proud of Isla for having the courage to share her speech in our remembrance assembly today – Well done Isla!

Class star of the week goes to Ruby B for being an excellent role model. Ruby is always trying her best in her learning and making a conscious effort to always follow the school rules. Well done Ruby!

Have a wonderful weekend 😊

Miss Lamonte
