

Weekly Learning Reflections

Good evening class Astute and families!

What another fantastic week it has been in our learning. The children have yet again worked their socks off. The Christmas play is looking and sounding amazing due to the children practicing their songs, dances and lines to make sure they feel confident and ready. They are very much so looking forward to performing for you all. Thank you for supporting the children with this at home!

In maths, we started our new learning on fractions. The children used lots of different practical resources to explore fractions – at first focusing on a half, quarter and a third before moving onto non-unit fractions and tenths. Through exploration and challenge, the children used their knowledge so far learned of fractions to connect them to decimals! Fantastic work class Astute.

We have now finished our non-chronological reports on our prehistoric creatures! The children have used descriptive expanded noun phrases and topic specific vocabulary to impart information on their creature to the reader.

Stars of the week 😊

Teacher star of the week goes to Lily! Always smiling, Lily is a ray of sunshine for class Astute. I always see Lily work hard in everything that she does. In particular, collaborating with her peers to create new and exciting dance choreography for the Christmas play. Well done Lily!

Class star of the week goes to Megan! This week, the children have thought about our talented contributors in the class and have chosen Megan for the title. The class were impressed by Megan's perseverance in her singing and also recent achievements outside of school in her BMX competition. Well done Megan!

Have a love weekend 😊
