

# Weekly Learning Reflections

## **Week Beginning:**

Happy Friday 😊

I hope that you all had a lovely break over the holidays and enjoyed time with loved ones.

The pupils of Radiant have settled back into the routines and expectations of school really well and have had a fab first week (all be it a three day one) back.

In maths, we have started our new unit on geometry and have been looking at 2D and 3D shape. We quickly became familiar of the properties of both 3D and 2D shape, such as learning about faces, vertices, edges and so on. This helped us to recognise each shape and also construct them using Polydron. Next week, we shall be learning about sizes of angles and different types of line so that we can draw shape confidently and accurately.

In English this week, we have started our letter writing topic. So far, we have deconstructed a letter for its features, explored paragraphs and learned the differences of formal and non-formal language and tone. Next week we will plan our letters in preparation to write them.

Please see my previous post for an insight of all that is to come this half term. It is going to be a busy one!

## ★ ★ ★ STARS OF THE WEEK ★ ★ ★

Pupil Star of the Week - ★ Charlie H ★

The children noted Charlie's efforts with independence and focus since returning from the holidays. He has been working hard and been getting involved in classroom discussions. I have also been impressed with his efforts

Teacher Star of the Week - ★ Kobey ★

It has been excellent to see Kobey's independence and ability to challenge himself this week. He has worked hard in Maths and English as well as showing amazing cooperation and collaboration skills when working with his peers.

Well done to our stars.

Hope that you all have a lovely weekend,

Mrs Mori 😊
