

Weekly Learning Reflections

Week Beginning:

Happy Friday 😊

What another fantastic week it has been.

The children have yet again worked their socks off. The Christmas play is looking and sounding amazing due to the continued practicing of their songs, dances and lines to make sure they feel confident and ready. They are very much so looking forward to performing for you all. Thank you for supporting the children with this at home!

In maths we've been practicing our multiplication and division skills from using counters to create arrays. This has helped us to strengthen our multiplication and division facts too and we now feel more confident in understanding commutativity. I have been impressed by the amazing times tables skills we have in Year 3. Having already mastered the 3 and 4 times table songs we are now focusing on the 8s. We are using https://www.youtube.com/watch?v=z_BJR9rdwA – if you fancy a sing along at home.

Our Science focus this half term is 'forces'. This week the children experimented with moving a ping pong ball to discover that all contact force can be categorized into pushes, pulls and twists. We then tackled labelling scientific diagrams before developing our scientific vocabulary.

★ ★ ★ STARS OF THE WEEK ★ ★ ★

Pupil Star of the Week - ★

Unfortunately, we ran out of time today and didn't get around to voting a class star of the week. We will catch this up on Monday

Teacher Star of the Week - ★ Hugo ★

Hugo's independence has shone this week as he has developed confidence in English and Maths. It has also been great to see his creativity shine in Art as well as improved cooperation and collaboration skills across all areas of the curriculum.

Well done to our stars.

Hope that you all have a lovely weekend,

Mrs Mori 😊
