

## Weekly Learning Reflections

**Week Beginning:** 25 November 2024

It was lovely to see so many of you at the open morning on Wednesday. The children were really excited to share their work with you and we hope you enjoyed the insight into what we have been working on so far this year. There's so much for the children to be proud of and we hope this came across.

This week has been slightly different with us taking some time to assess the children's learning so far this year. They have worked incredibly hard at the different activities and have tried their best to apply their learning. It has been really pleasing to see the children challenging themselves and persevering even when unsure and their attitudes have been fantastic.

Across the curriculum, the children have continued to work hard focusing on passing and dribbling in football, exploring ways to represent data in Geography and investigating changes to a circuit that either brightens or dims a bulb. It has been great to see them using a variety of learning skills and applying themselves well in all areas.

★ ★ ★ **STARS OF THE WEEK** ★ ★ ★

**Pupil Star of the Week - ★ Ellen ★**

Ellen has been chosen as the Class Star this week! She has shown excellent exploration skills, looking for new ways to problem solve and challenge herself in her learning. This has ensured she has achieved success and produced some excellent work as a result. Your peers have nominated you for fantastic reasons and you've had a brilliant week Ellen, well done!

**Teacher Star of the Week - ★ Theo ★**

My Star of the Week this week is Theo! Theo continually works hard and is always striving for ways to improve in his learning. Eager to ask questions to help him understand, Theo shows a good level of inquisitiveness that helps him greatly. He is also a fantastic team player and supports others to be successful in their learning. Well done Theo, you've had an excellent week!
