~~It's~~ ~~This~~ This is an ancient Mayan calendar. They used it to tell when to grow crops and tell ~~with~~ which month it is. The Mayan calendar system, including the 260-day ceremonial and 365-day solar calendars, reflected their beliefs about time and the universe. They ~~believed~~ believed that time directly connected to the gods' actions. This system was important for religious ceremonies, farming activities and predicting events.

Monitor case evaluation

- People will buy my monitor because it won't wake you up and tell you is your time each day.
- My design looks like a cute little dragon holding the monitor and white with sluggy wings.
- this is because it will make you smile.
- When I designed my monitor the most important thing I considered was the colours, size and shapes because it takes time to design it.
