During 2025–2026, Ranvilles Junior School received £18,470 of PE and Sport Premium funding, all of which was invested in improving the quality of physical education, increasing participation in sport and physical activity, and enhancing opportunities for all pupils

A significant proportion of funding was invested in external coaching staff (£12,043), enabling pupils to benefit from specialist sports coaching and a broader range of high-quality sporting experiences. This specialist provision has helped to raise standards in PE, increase pupil engagement and provide pathways for talented pupils to further develop their sporting abilities. External coaches have supported the identification and development of pupils with particular sporting strengths, enabling them to achieve success in a range of sporting activities.

The funding has also enhanced opportunities for pupils to participate in extra-curricular sport, with £2,305 invested in widening access to clubs, sporting activities and active lifestyles beyond the school day. These opportunities have encouraged greater participation, improved confidence and helped children develop teamwork, resilience and leadership skills

Investment in equipment and resources (£3,419.52) has ensured pupils have access to high-quality sporting equipment to support both curriculum PE and extra-curricular activities. This has increased participation levels and enabled a wider variety of sports and physical activities to be offered across the school.

Funding has also been used to support staff professional development, including PE CPD (£775) and swimming instruction training (£255.41), helping to improve the quality and sustainability of PE provision for current and future pupils.

Particular emphasis has been placed on ensuring inclusive access to sport. Targeted spending on specialist coaching has supported pupils with SEND, disadvantaged pupils and girls' participation in PE and extra-curricular sport, ensuring that all children are able to benefit from a wide range of physical activities and competitive opportunities.

Specialist coaching has helped develop sporting talent within the school and has enabled pupils with particular strengths to compete at a higher level.

Swimming and water safety outcomes have remained positive, supported through additional investment of £397.52 in top-up swimming lessons and aquatic opportunities. At the end of Key Stage 2, 73% of pupils were able to swim competently, confidently and proficiently over 25 metres, use a range of strokes effectively and perform safe self-rescue in different water-based situations. The school judged the impact of this investment on swimming and water safety attainment to be positive.

The investment in specialist coaching and staff professional development has strengthened both pupil outcomes and staff expertise. By improving teachers' knowledge, confidence and skills, the school is building sustainable capacity to continue delivering high-quality PE and sport provision. The combination of enhanced curriculum delivery, increased extra-curricular opportunities and access to competitive sport will continue to support high levels of participation, enjoyment and achievement in physical activity for future cohorts of pupils.
